View report

How much milk will it give?

MaweshiAI

Sahiwal cows usually give about **8–10 litres a day** with good feed, clean water and shade.

This cow looks young and healthy, so she can do well. But milk can't be measured from photos – **ask to watch one full milking** before you pay.

VERDICT

Recommended **78** /100

Healthy Sahiwal cow, good fit for milk production.

Young animal with no visible signs of Foot-and-Mouth Disease. Confirm milk yield and vaccination record before payment.

Summary

Check	Result	AI confidence
Species	Cattle (cow)	**98%**
Breed	Sahiwal	**82%**
Age	About 3 years (2 permanent teeth)	—
Health	✓ No FMD signs on mouth, feet or hooves	—
Purpose fit	Milk (Dairy): **Strong fit**	—

Reasons for this verdict

- Sahiwal is a well-known dairy breed of Pakistan.
- Young (~3 years) with a long milking life ahead.
- No signs of FMD on mouth, feet or hooves.
- Good body shape and condition in photos.

Risks to consider

- Milk yield can't be seen in photos – watch one full milking.
- Ask for the vaccination record (FMD, HS).
- Check the udder and all four teats by hand.
